DETAILED ACTION

Applicant's election without traverse of Group II in Paper No. 8, filed 1/17/03 is acknowledged. It is noted that applicant has canceled the non-elected claims and claims 15-18 and 20-23 are under examination.

It is noted that the restriction requirement mailed 9/19/02 also included a restriction requirement based on SEQ ID NOS 1, 2, and 5. It is noted that applicant argues this requirement as a species requirement. It is noted that there is not species requirement of record. Although applicant election of a "species" is improper, the examiner has, upon reconsideration, rejoined the inventions defined by SEQ ID NOS: 1, 2, and 5.

Claims 15-18 and 20-23 and SEQ ID NOS: 1, 2, and 5 are under examination.

Claims 15-18 and 20-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "said cultured TGF- blocking agent-treated stem cell" in line 10. There is insufficient antecedent basis for this limitation in the claim.

Claim 16 recites the limitation "said enriched stem cell composition" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "wherein the linkage is the phosphorodiamidate" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 19 depends from a canceled claim rendering the metes and bounds of claim 20 unclear.

Claims 17, 20, 22, and 23 are rejected as they depend from claims 15, 16 and 18.

Claim 20 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Applicant is advised that should claim 17 be found allowable, claim 20 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Art Unit: 1635

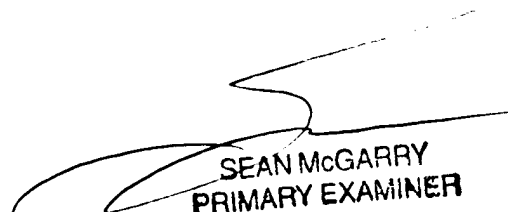

The claim as filed are free of the prior art searched. The closest prior art found is Klein et al [US 5,958,774] which discloses the prestimulation of human stem cell with antisense (including SEQ ID NO: 1 which overlaps SEQ ID NO: 1 of the instant invention) targeted to TGF- β in a method of gene transfer. Klein does not disclose nor teach treating human stem cells with TGF- targeted antisense in annex vivo treatment of cells in a method of decreasing the time for hematopoietic reconstitution of a patient following chemotherapy or radiation treatment, for example.
